GREEN ENVIRONMENT 1.0

This project is using HTML 5 and CSS3 and Bootstrap for the front-end and pure PHP and MySQL for its backend part. Its database consists of 9 tables. (The database schema is shown at the end of this document)

In its php :

-   it uses procedural method with mysqli to connect to the database
-   Uses Sessions
-   Working with forms

In this project 3 different users can log in to the system and have different access.

1. Employer :

User Management (Doing CRUD on user)

Adding different projects

Checking the entering and exiting of employees

2. Executive :

Due to the domain of interest, it can do create, update, delete on employees.
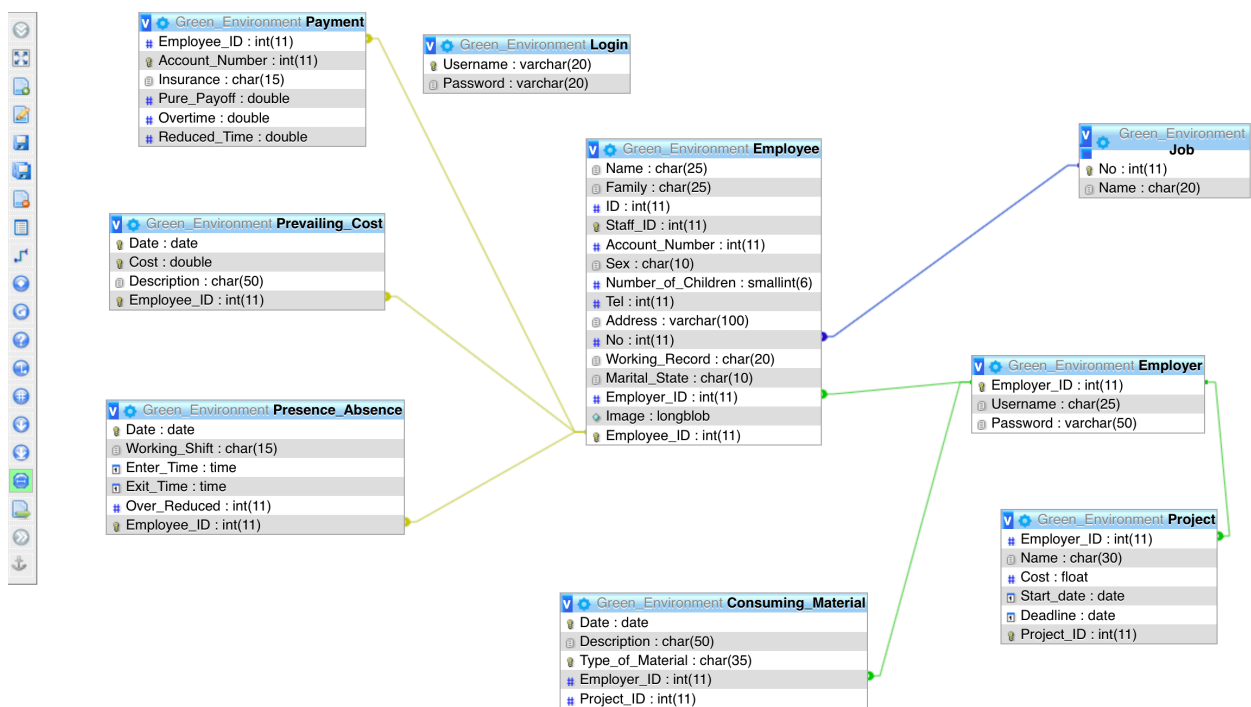

Adding prevailing cost

Adding payment

Filling the presence and absence table

Adding Consumed materials

3. Financial :

Due to the domain of interest, in this section reports on payment table and cost table are available.
